Fayyaz Travels Admin Panel — Simple Guide

Point-wise • Sidebar menu explained • Add Package 14 steps

Quick start

- Login with email and password.
- You land on Dashboard (home).
- Use left sidebar to open each module.
- Top bar has search, enquiry alerts, and logout.

Dashboard

- Shows stats (packages, blogs, pages, users, enquiries).
- Shows chart and recent activity.
- Quick Actions take you to Add Package, Blogs, etc.
- View only — use sidebar to create or edit content.

Blogs Management

Same as sidebar:

- **All Posts** — see every blog in one list.
- **Write New Blog** — create a new blog (title, content, image, category).
- **Drafts** — blogs not published yet.
- **Pending Review** — waiting for approval.
- **Scheduled** — set to publish later automatically.
- **Published** — live on the website.
- **Blog Categories** — add/edit categories used on blogs.

How it works:

- Write New Blog → fill details → save as draft / schedule / publish.
- Open any post from a list to edit.
- Change status anytime (draft ↔ published).

Page Management

Same as sidebar:

- **All Pages** — all CMS pages in one list.
- **Create Page** — make a new website page (About, Contact, etc.).
- **Drafts** — pages not live yet.
- **Published** — pages live on the website.

How it works:

- Create Page → add content + SEO → save.
- Edit from the list anytime.
- Publish when ready; it shows on the public site.

Packages

Same as sidebar:

- **Package Dashboard** — package overview and stats.
- **All Packages** — full package list.
- **Draft Packages** — unfinished packages.
- **Pending Reviews** — waiting for approval.
- **Expiring Rates** — packages whose rates expire soon.
- **Add Package** — open the 14-step package wizard (see next section).
- **Supplier Quote Requests** — packages used for supplier quotes.
- **Package Categories** — categories for packages (under Settings).
- **Pricing Rules** — pricing rules used in packages (under Settings).

How it works:

- Click **Add Package** to create a new tour package.
- Or open a package from any list to edit (same 14 steps).
- From the list you can edit, preview, or delete.

Add Package (14 steps) — how each step works

Open sidebar → Packages → Add Package. Fill each step, click **Save & continue**. You can save draft anytime.

1. Supplier Source — choose supplier

- Select or enter the supplier for this package.
- Fill: supplier name, package name, country, contact person.
- Add emails, WhatsApp, and upload quotation / brochure / rate sheet.
- Add internal supplier notes if needed.
- Save & continue → package is created (if new) → go to step 2.

2. Package Basics — name, destination, duration

- Enter front-end package title (customer-facing name).
- Slug is created from the title (URL name).
- Add short intro and Package Overview.
- Set tour type, countries, cities, start/end point.
- Set days / nights, categories, landing pages.
- Add Important Info and Frontend Notes.
- Save & continue → go to step 3.

3. Media & Front-End — photos / images

- Upload desktop hero, mobile hero, and package card images.
- Add alt text for images.
- Upload Package Highlights images.
- Optional: video link.
- Set price display type and primary / secondary CTA buttons.
- Add WhatsApp number and “Why choose this package”.
- Save & continue → go to step 4.

4. Pricing — package price

- Choose pricing type: General Package or Fixed Departure.
- Add prices per hotel category.
- Set adult price tiers (net / markup / selling).
- Set child pricing if needed.
- Add blackout dates and promotions.
- Save & continue → go to step 5.

5. Itinerary — day-by-day plan

- One tab for each day (based on days set in Package Basics).
- Per day: title, description, activities, highlights.
- Mark meals (Breakfast / Lunch / Dinner).
- Add internal notes (consultant, mobility, dietary, supplier).
- Save & continue → go to step 6.

6. Hotels — hotel details

- Add one or more hotels.
- Fill: hotel name, city, star rating, room type, nights.
- Add child policy, max occupancy, address, Google Maps link.
- Choose if hotel shows on front-end; add internal notes.
- Save & continue → go to step 7.

7. Inclusions — what is included / excluded

- Turn on transport options (flights / train / transfers) if included.
- Add Included list, Excluded list, and Optional add-ons.
- Add local fees, taxes, and non-refundable items.
- Save & continue → go to step 8.

8. Booking Policy — terms and rules

- Set payment mode, deposit, and when balance is due.
- Set confirmation rule.

- Add cancellation charges (From / To / Client charge).
- Add amendment policy and exception rules.
- Mark refundable vs non-refundable parts.
- Save & continue → go to step 9.

9. Consultant View — internal notes

- Internal only — customers do not see this.
- Write how to sell, best client type, common objections.
- Add suggested replies, upsells, and do-not-promise notes.
- Add visa/passport, dietary, risks, and follow-up tips.
- Save & continue → go to step 10.

10. Supplier Quote Tool — quote settings

- Prepare a quote request to the supplier.
- Set travel dates, pax, hotel/rooming/meals, deadline.
- Add changes and negotiation notes.
- Choose email recipients, subject, and body.
- You can save the quote draft and/or send the email.
- Save & continue → go to step 11.

11. Front-End FAQs — questions for customers

- Add FAQs that show on the public package page.
- Each FAQ: question + answer + visibility on/off.
- Add or remove FAQ rows as needed.
- Save & continue → go to step 12.

12. Sales & Ads Assets — marketing files

- Create sales and ad content for marketing/sales team.
- Add Google ad headlines, social captions, share message.
- Add campaign WhatsApp link.
- Generate sales card preview from hero image, title, price, CTA.
- Save & continue → go to step 13.

13. SEO — Google title and description

- Set meta title and meta description for Google.
- Add focus keyword and secondary keywords.
- Link related packages and internal links.
- Set index status and SEO status.
- Save & continue → go to step 14.

14. Review & Publish — final check and go live

- See which sections are complete (health check).
- Assign reviewers if needed (Product / SEO / Ops / Final approver).
- Add final review notes.
- **Save & continue** — save review data only.
- **Submit for review** — status becomes Pending Review.
- **Publish** — package goes live on the website.
- Use Preview before publishing.

Tip: You do not need to finish all 14 steps in one go — save draft and return later. Edit any package anytime from the Packages list.

8. Suppliers

- Add and manage travel suppliers.
- Save contact details and countries.
- Use these suppliers when creating a package (Step 1).

9. Promotions

- Screen to create offers / promotions.

- Currently demo only (sample data, not fully saved to server yet).

10. Enquiry

- See customer enquiries / leads.
- Open a lead and read the message.
- Update status (open → in progress → closed).
- Follow up with the customer by phone or email.
- New open enquiries also show in the top header.

Common simple flows

- Publish package: Dashboard → Add Package → complete 14 steps → Publish.
- Write blog: Blogs → Write New → Save / Publish.
- Create page: Pages → Create → Publish.
- Handle lead: Enquiry → open → update status → call/email customer.
- Add user: Settings → User Management → Add User (super admin).

Simple notes

- If a menu item is missing, your role may not have permission.
- There is no separate Bookings module in this admin.
- Logout from the user menu at the top right.
